

Composite Sliding Patio Door

with Knockdown Frame

Shown with optional blinds-between-the-glass

Superior Strength Composite material;
8X thicker than other vinyl doors

Integrated Insulation Cellular material
integrated into the vinyl outperforms
foam filled doors

Low Maintenance Never needs
painting or refinishing

Modular Design Each component weighs
less than 80 lbs; fits in SUV or pickup

Pre-Applied Gasket Door stays watertight

The **4700 Series** Sliding Patio Door with Knockdown Frame is comprised of an innovative cellular sash technology, that provides both exceptional strength and durability. Its modular design allows for easy transport and assembly by a single person.

4700 Series

An Innovative Door

Innovative Design Features

- 1 Choose between standard white or optional **Premium Handles** in satin nickel or black.
- 2 Slides better than other doors; thanks to an innovative **Metal Truck and Monorail System**.
- 3 **Blinds Between the Glass** with slider control and grids between the glass are premium upgrades.
- 4 Patent-Pending, **Guide Pin System** helps construct The 4700 Series Door.
- 5 The steel reinforced **Extra Thick Composite Door** offers increased security and stability.
- 6 The mainframe **Sill with Weepholes** keeps water out of the house.
